

Ref: 102

Job Title: **Senior Product Manager**

About the Company

Sastra Robotics is a 5-year old Robotics company based in Cochin, Kerala with a specialization in the design and manufacture of class leading “**Automated Test Systems & Solutions**”. We also provide OEM Representation in India for ‘Robotic Parts & Development tools’. Since 2013, our team has been creating innovative robotic products and solutions, consistently delivering excellence to an expanding client base that includes highly reputed enterprises such as Robert BOSCH, Honeywell, HCL, etc. Our products are being used by OEMs, ODMs, System Integrators & Service Providers alike to expedite test cycles, shorten time-to-market, reduce cost and to improve asset utilization. Our core focus is on building robotic solutions that mimic human actions and reactions for high-fidelity testing and remote operation of physical devices in Aviation & Automotive cockpit HMIs, Medical & Fin-tech Smart HMIs as well as Industrial & Commercial touch screen-based HMIs.

The Role

We are looking for a star performer Senior Product Manager with a 5-15 years of prior experience in product development in the field of robotics, motion-control and test automation. In this role, you will be responsible for product strategy, feature definition and the translation of the overall concept into a finished product. You will act as the interface between external customer stakeholders and our internal R&D teams, meet stretch technical goals and ensure that predictable outcomes are achieved.

Reporting

You will report directly to the CTO of Sastra Robotics.

Key Responsibilities

- Develop and implement product strategies consistent with the company vision
- Collect and analyse feedback from customers, external stakeholders and internal teams to shape requirements, features and end products
- Work with senior management to create product plans and roadmaps
- Lead product teams and coordinate cross-functional teams
- Create and own Product Requirements Documents (PRD)
- Ensure development releases and product launches happen on schedule
- Make creative recommendations to expand product base, quality and usability
- Implement processes to track post-deployment product use and impact on end users

Skills Required

- Proven experience as a Product Manager or similar role
- Experience in product lifecycle management
- Background in software development and program management is preferred
- Familiarity with Agile framework
- Organisational and leadership abilities
- Excellent communication skills
- Problem-solving aptitude
- Creative thinking skills

Educational Qualifications

- MTech/BTech in Computer Science or Engineering

Benefits

- Learning & Development: You will directly get linked with Sastra's advisory network that consists of industry veterans including CXOs.
- Dedicated training budgets to help you participate in continuous learning programs
- ESOP benefits as you grow into the company

Job Location

Bangalore will be your home base with frequent travel to Sastra's R&D Labs in Cochin.

To Apply

Submit the following to join@sastrarobotics.com

1. Resume detailing your experience
2. Cover letter explaining why you would be a great fit for this position
